SECTION 6	COMPLETING PACKAGES
SECTION 7	OPTIONAL EQUIPMENT

PARTS

It is the policy of Hiniker Company to constantly improve its products whenever it is practical to do so.

Hiniker Company must therefore reserve the right to redesign or change its equipment or component parts thereof without incurring the obligation to install or furnish such changes on the equipment previously delivered.

INSTRUCTIONS FOR ORDERING PARTS

1. The reference numbers (Ref. No.) in the illustrations correspond to the same reference numbers (Ref. No.) in the description list. An assembly having a part number can be ordered. All other parts must be ordered individually. The quantity in the "Qty" column is the number of parts used in this area of the machine. The term "A/R" for number required indicates "as required" where the quantity may vary. Order all parts by their part number and description. Do not use the reference number (Ref. No.).
2. All references to left and right, front and rear apply to the machine as viewed from the rear of the machine, facing forward in the direction of travel.
3. Always mention the identification number of the model and serial numbers found on the name plate of the unit on which the part is to be used. Much delay and confusion can be avoided when correct numbers are specified on parts order and correspondence.
